Summary

A passionate **Information Systems student** and aspiring **full-stack developer** from Ethiopia, focused on building modern, **fast**, and **user-friendly web applications** using technologies like **Next.js, React, Node.js, JavaScript, and TypeScript**. I enjoy turning ideas into real, working products with **clean design** and smooth **user experience** across all devices.

My experience includes both **frontend and backend development**, working with databases such as **PostgreSQL and MySQL**, and building **RESTful APIs** for full-stack applications. I also have hands-on experience using tools like **Git, GitHub, and Vercel** for version control and deployment.

I take pride in writing **clean, maintainable code** and solving real-world problems through **logical thinking** and continuous learning. I am motivated to grow my skills further and contribute to meaningful projects while working in a **collaborative development environment**.

Projects

Personal Portfolio Website Built a responsive developer portfolio to showcase my skills, projects, and contact information with a modern UI and fast performance. *Tech Stack: Next.js, React, Tailwind CSS, TypeScript*

Mosque Management System Developed a full-stack web application for managing mosque activities such as prayer times, announcements, donations, and events. *Tech Stack: Django, React, PostgreSQL*

E-Commerce Website Created a modern e-commerce platform with product listing, cart system, authentication, and order management. *Tech Stack: Next.js, React, Node.js, PostgreSQL*

Ethio HRMS System Built a Human Resource Management System for managing employees, departments, and attendance in an organization. *Tech Stack: React, Node.js, PostgreSQL*
